- 13) Ice Cream Man / 14) Bad Habits

David Lee Roth became a household name in the 80's as the energetic and charismatic frontman of rock legends, Van Halen, releasing a number of extremely successful records with that band. In 1985, he departed Van Halen and launched a highly successful solo career with hit singles and albums, wildly creative videos and always remaining an irrepressible, undeniable Rock 'N Roll icon for millions of fans worldwide who have long known him as "Diamond Dave". For many, he is the ultimate frontman in the history of American rock music.

Now David Lee Roth exercises his sense of musical style in an all out Dave-fest that he calls "Diamond Dave". Choosing great songs from the history of rock'n'roll, David Lee Roth makes these songs his own. Whether interpreting songs originally recorded by Steve Miller, Jimi Hendrix, The Doors, The Beatles or Savoy Brown, "Diamond Dave" invigorates these songs with a new attitude and an understanding only someone who has traveled to the top of the rock'n'roll summit would know.

David Lee Roth will be touring the US heavily and will also be seen on VH-1, VH-1 Classic, MTV and late night TV. "Diamond Dave" is known for his over-the-top performances and interviews and will be available for selected press, radio and retail appearances.
